

NRG™ SERIES

**The battery line that's
as competitive as you are.**

OEM-replacement batteries at prices that can help you get the job done for less.

The NRG Series of replacement batteries is compatible with these popular radio brands:

- Icom
- Kenwood
- M/A-COM
- Maxon
- Yaesu/Vertex
- And Others

Price and performance...

No matter what business you're responsible for running, cost-effective communication is essential. Now price and performance are both at their very best with the new NRG™ battery line. These quality nickel-cadmium and nickel metal hydride replacement batteries are competitively priced and offer reliable performance.

NiCd batteries provide the maximum number of charge/discharge cycles and are best suited for temperature extremes. NiMH batteries provide more talk time per shift and are less prone to memory effect. Either way, you'll enjoy dependability you can count on.
